

N°1 FOR HUMIDITY PROTECTION

SODEPAC
INTERNATIONAL

A company tailored to your needs

SODEPAC, the inventor of the humidity absorber and specialist in humidity treatment for 40 years, offers a range of **humidity protection solutions** for both industrials and the general public. Continued substantial investments in our Research and Development department enable SODEPAC to be **a major player in Europe and to expand global presence**. SODEPAC's rapid response and ability to develop tailor-made solutions ensure that we remain **a solid partner and a major asset** for your company and your clients.

OUR KNOW-HOW

We have a 20,000 sqm based near Lille in Northern France that gathers a full know-how.

Human skills
and manpower

A dynamic R&D
department

High
responsiveness

First-class
quality
control

Thanks to the versatility and flexible nature of our tools and personnel, **we can easily adapt to handle variations in ordered quantities while guaranteeing excellent quality** in our finished products. **We also have a logistics platform that is large enough to meet our customers' demands in the shortest possible time.**

SEKO Dry[®]

**Designed solutions for industry, packaging
and maritime shipping professionals**

Control humidity, odors and ethylene; Protect your goods, respect the environment

With the SEKODRY[®] brand, SODEPAC provides a range of innovative solutions dedicated to industrial, packaging and logistic professionals, enabling them **to protect their goods from humidity, odors and ethylene**. SODEPAC ensures that your goods travel safe, enabling you to protect and preserve food products such as cocoa, coffee, tea, rice, fruits and vegetables, flour, mineral water, animal feed and also metallic items, canned goods, tobacco, fabrics, etc.

Approved by professionals and experts

Rather than just relying on comparative studies that always come out in favor of those who publish them, we look to **customer satisfaction and expert recommendations** to underline the effectiveness of our solutions. Indeed, **SEKODRY[®] has been admitted best product by a panel of independent experts*** for sea transport from West Africa to Europe and Asia bearing agricultural products (cocoa). This study was particularly useful as it subjects very sensitive products to extreme climate variations.

SODEPAC operates worldwide and is the **world leader for the protection of cocoa and cashew nut** shipped from West Africa, the world's largest producer.

SEKO Dry® Range

Humidity	 Absorber Ultra		Dryer bag to regulate the humidity within a container. Available in classic version.
	 Desiccant Green		Dessicant for a rapid absorption in a closed space.
Container dressing	 Cardboard		Cardboard for sea container's dressing.
	 Bulk Liner		Protection for bulk container.
Strong smells	 Odor Killer		Patch eliminating strong odors.
Food preservation	 Ethylene Trap		Prolong the preservation of fruits, vegetables and flowers during shipment.
Leaks and accidental spills	 Absorbent Ultra		Eco-friendly absorbent powder for all liquids (all bar hydrofluoric acid). Extremely light and compact.

Solutions against shipping damages

Strong and persistent smells

Rotten fruits

Damaged and soaked boxes

Mold

Spilled liquids

Rust

seko Dry[®]

Absorber

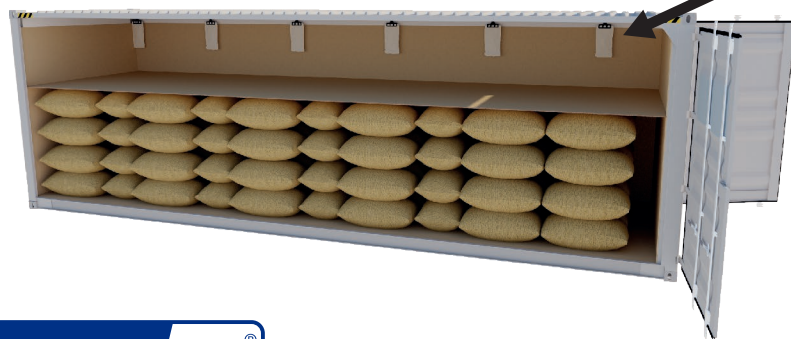

Protege your goods againts humidity damages. Leader in France and Western Africa.

seko Dry[®]

Cardboard

Dressing for sea container

The temperature drops might produce condensation on the container's walls. For an optimal protection, SekoDry[®] Cardboard can be combined with SekoDry[®] Absorbers. SekoDry[®] Cardboard acts as a protective layer by absorbing the condensation and protects merchandises from moistening.

- Insulating barrier (5 layers)
- Corrugated cardboard for maximum rigidity
- 100% recyclable material, 70% FSC
- Follow recommendations of ICCO
(International Coffee & Cocoa Organisation)

- Absorbs ethylene gas, up to 8-week-protection.
- Increases considerably the preservation of fruits, vegetables and flowers during shipment and storage.
- Easy-to-use with 2 hooks.
- Does not leak at saturation point.
- Does not release any odor or dust.

Ethylene gas is responsible for the ripening of fruits and vegetables, accelerating their rotting process. Among the most sensitive products, there are apples, pears, avocados, tomatoes, bananas, mangoes, melons, peaches, litchis, passion fruits, broccolis, cauliflowers, flowers, etc.
